FALL WINTER 25 COLLECTION

[joma-sport.com](http://joma-sport.com)

# History

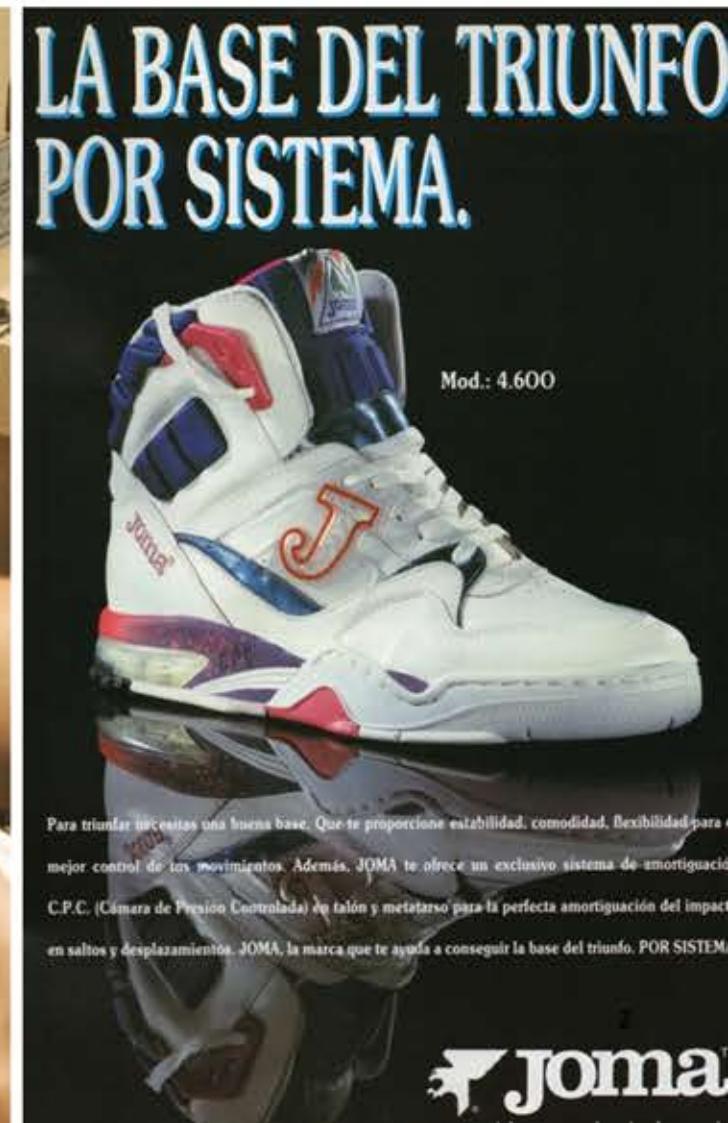

In 1965, Fructuoso López founded Joma with the goal of producing high-quality sports footwear. Although the brand has traditionally been associated with these products, he decided to venture into the casual footwear sector, catering to those who seek style and comfort in their everyday lives.

In recent years, at Joma, we have worked to strengthen our casual footwear lines and maintain a strong presence in the conventional shoe and sneaker markets with powerful collections. One example is Heritage, **created from running shoe designs that Fructuoso López developed in the 1970s.**

Now, the brand is once again focusing on creating a unique identity by adapting iconic futsal models from the 80s, 90s, and 00s to current trends. An example of this is the Flexy, the evolution of the iconic Top Flex. Our projection is so strong that the Spanish delegation in Paris wore Joma as they walked through the French capital in the opening ceremony of the 2024 Olympic Games.

Innovation has always been a part of Joma's DNA. You only need to look back a few decades to recall that Joma introduced color to football footwear in the late 90s.

**FOOTBALL BOOTS STOPPED BEING BLACK AND WERE DYED IN OTHER COLORS, FOREVER REVOLUTIONIZING THE PLAYING FIELD.**

# Campus

MEN | CCAMW25

Its design, inspired by collegiate looks, adds a vintage touch to everyday outfits, offering new combinations that expand the range of styling possibilities.

The upper is made of durable synthetic leather, and the MEMORY FOAM insole is designed to fully adapt to your stride and provide cushioning. It is now more breathable thanks to the application of the VTS perforation system. The rubber sole features DURABILITY technology, offering high resistance to abrasion and wear.
